

Notes from meeting with Hovik:

- Consider issues of classes from previous years, need to differentiate based on year and term → done
- Build a more sophisticated website-flow → in progress, progress will be shown in this document
- Adding in pre-reqs and grade-schemes into the course's schema → done
- Contact REGIS about data → done, moving towards building a website scraper to get data, is an immediate task
- Connected students to departments to ensure we have a 'major field' → done
- Added a professor's schema → done

DDL is turned in a separate file

This is the in-progress website flow that we are considering:

Class ID	Class Name	Instructor	Time	Location	Grade Scheme	Prereq	Add to my Schedule
----------	------------	------------	------	----------	--------------	--------	--------------------

View my Schedule
